

# SUMMER GLOBAL INTERNSHIP PROGRAM

## London, England

### What did I learn?

- Experience interning in an industry I hope to work in after graduation.
- While my main area was retail operations, I gained exposure to all departments.
- Learned about the different working culture abroad.
- Learned about the many different and diverse cultures in both the U.K. and other places I went on my travels.

### Motivation

- Previous experience living abroad (3+ years).
- Desire to work abroad after graduation.
- Desire to explore new cities and experience new cultures.

### Project Description

My STEP signature project was the Summer Global Internship Program in London, England. This project took place from May 31st to July 27th and involved me participating in an internship with Hackett London, a men's clothing company. I was an intern with the retail operations department and completed a variety of tasks including liaising between the head office and our retail stores, preparing sales reports, and setting the sales targets for our stores.

### Favorite Part

Making new friends I will remain friends with for my whole & being able to reconnect with old friends from when I used to live in Europe.

### My Transformation

- Prepared me for work after university:
  - International experience
  - Industry experience
- Exposed me to new cultures and made me more diverse and well rounded.
- Made new work connections and lifelong friends.
- Living a foreign city on your own for the first time really helps you grow as a person.
